Flooring Clip-System

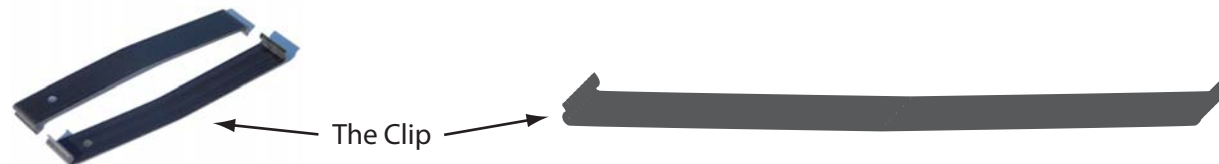

The 129mm wide "Clip System" is available in both 14mm and 20mm thick strips.

The "Clip System" flooring can be laid on most types of level and dry surfaces, including sand and cement screed, timber floor boards, and chipboard etc. The flooring quick and easy to install and comes at the set width of 129mm. The system allows the timber to move slightly (as timber is a natural material that reacts to its environment) which reduces the risk of distortion once laid.

20mm clip system

14mm clip system
